

Application No. 10/707,182  
Amendment dated September 29, 2005  
Reply to Office Action of June 29, 2005

Docket No.: 60680-1722

### LISTING OF THE CLAIMS

1. (Original) An oil separator for an internal combustion engine, comprising:  
a basket sealingly mounted to a valve cover of an engine, the basket containing at least one vent for allowing blow-by gas and oil particles to pass therethrough;  
a breather lid sealingly mounted to the basket; and  
a filter media disposed between the basket and the breather lid for separating oil particles from the blow-by gas.
2. (Original) The oil separator according to Claim 1, wherein the basket forms a seal with the valve cover.
3. (Original) The oil separator according to Claim 1, wherein the basket forms a seal with the breather lid.
4. (Original) The oil separator according to Claim 1, wherein the breather lid includes an outlet port for allowing the blow-by gas to exit the oil separator.
5. (Original) An oil separator for an internal combustion engine, comprising:  
a basket sealingly mounted to a valve cover of an engine, the basket containing at least one vent for allowing blow-by gas and oil particles to pass therethrough;  
a breather lid sealingly mounted to the basket; and  
means disposed between the basket and the breather lid for separating oil particles from the blow-by gas.
6. (Original) The oil separator according to Claim 5, wherein the basket forms a seal with the valve cover.
7. (Original) The oil separator according to Claim 5, wherein the basket forms a seal with the breather lid
8. (Original) The oil separator according to Claim 5, wherein the breather lid includes an outlet port for allowing the blow-by gas to exit the oil separator.
